Report on rats from city wharf and Chinese, Japanese, and Latin quarters of San Francisco, examined during the week ended June 6, 1903.

The following is received from Assistant Surgeon Currie, through Passed Assistant Surgeon Blue, under date of June 6, 1903:

Number of rats caught alive.....	18
Number found dead	4
Number showing lesions of phosphorus poisoning	0
Number showing pest infection.....	0

Death from plague at San Francisco bacteriologically confirmed.^a

[Telegram.]

SAN FRANCISCO, CAL., June 17, 1903.

WYMAN, Washington.

Diagnosis bacteriologically confirmed in case 95.

BLUE.

Vaccination of railroad employees on Mexican frontier.

Acting Assistant Surgeon Hamilton, at Laredo, reports June 5 as follows: In reference to a railroad employee having broken out with smallpox within two days after arrival in the United States, I quote you part of reply of railroad superintendent to whom I wrote, stating the facts, with request to have employees running into Mexico vaccinated: "He went to hospital sick, and nothing more was thought of his case than any other sick employee coming to the hospital. After he had been there a day or two the doctor found that he had smallpox, and he was removed from hospital. I am to-day writing our chief surgeon regarding the vaccination of the employees. A copy of reply from the chief surgeon was received by me to-day from the superintendent, the substance of which is, that although he knows of no locality on the line where smallpox prevails, yet in the interest of public health those employees not protected as stated should be vaccinated. He therefore issues instructions that all employees crossing into Texas be vaccinated without delay. The chief surgeon has instructed local surgeons accordingly."

Statistical reports of States and cities of the United States—Yearly and monthly.

CALIFORNIA—*Stockton*.—Month of May, 1903. Estimated population, 18,000. Total number of deaths, 24, including 3 from tuberculosis.

FLORIDA—*Tampa*.—Month of May, 1903, Census population, 20,000. Total number of deaths, 14, including enteric fever, 3, and 1 from tuberculosis.

ILLINOIS—*Peoria*.—Month of May, 1903. Estimated population, 56,100. Total number of deaths, 64, including 11 from tuberculosis.

IOWA.—The HEALTH BULLETIN says:

Outbreaks of the following infectious diseases were reported as having occurred in the following places during the month of April:

Diphtheria.—Des Moines; Fraser; Thompson; Liberty Township, Jefferson County; Newton Township, Winnebago County.

^a This case was reported in Public Health Reports of June 12, No. 24, page 903. The death occurred on June 5, 1903.

Measles.—Sac City; Leroy Township, Benton County; Boone; Des Moines; Iowa City.

Scarlet fever.—Lyons Township, Mills County; Boone; Langdon; Des Moines; Richland Township, Mahaska County; Doon; Washington Township, Polk County; Vernon Township, Humboldt County; Norway; Webster City; Iowa City; Greenfield.

Smallpox.—West Liberty, 1 case; Graham and Lucas townships, Johnson County, 1 case each; Newark Township, Webster County, 5; Brockton, 5; Grant Township, Lyons County, 1; Jackson Township, Warren County, 3; Rockwell City; Sac City, 2; Boone, 5; Clinton, 18; Washington, 2; Liberty Township, Jefferson County, 2; Riceville, 2; Jamestown, 1; Wayne and Jenkins townships, Mitchell County, 1 and 2, respectively; Des Moines, 4; Webster City, 4; Williams, 2; Newhall, 1; Scott Township, Madison County, 5; Nevada Township, Story County, 2; Lick Creek Township, Van Buren County, 1; Fraser, 2; Bagley, 1; Iowa City, 9.

Typhoid fever.—Des Moines, Marshalltown, Fort Dodge.

LOUISIANA—*New Orleans*.—Month of May, 1903, estimated population, 310,000; white, 227,000; colored, 83,000. Total number of deaths, 614; white, 384; colored, 230, including diphtheria 2, enteric fever 8, whooping cough 1, smallpox 1, and 98 from tuberculosis.

MASSACHUSETTS—*Brockton*.—Month of May, 1903. Estimated population, 44,873. Total number of deaths, 40, including whooping cough, 1, and 9 from phthisis pulmonalis.

Newton.—Month of May, 1903. Estimated population, 37,794. Total number of deaths, 40, including 3 from tuberculosis.

MICHIGAN.—Reports to the State board of health, Lansing, for the week ended June 6, 1903, from 65 observers, indicate that diarrhea, pneumonia, pleuritis, inflammation of bowels, and cholera morbus were more prevalent, and bronchitis, influenza, measles, smallpox, whooping cough, and erysipelas were less prevalent than in the preceding week.

Meningitis was reported present at 1 place, whooping cough at 24, enteric fever at 36, diphtheria at 39, scarlet fever at 61, measles at 62, smallpox at 79, and phthisis pulmonalis at 192 places.

NEBRASKA—*Omaha*.—Month of March, 1903. Census population, 102,555. Total number of deaths, 105, including diphtheria 1, enteric fever 1, measles 1, scarlet fever 3, and 9 from tuberculosis.

Month of April, 1903. Census population, 102,555. Total number of deaths, 85, including diphtheria, 1; enteric fever, 1; measles, 1; and 10 from tuberculosis.

NORTH CAROLINA.—Reports to the State board of health for the month of April, 1903, from 24 towns having an aggregate population of 120,100—white 70,150, colored 49,950—show a total of 173 deaths—white 76, colored 97—including enteric fever 3, measles 1, whooping cough 5, and 25 from phthisis pulmonalis.

OHIO—*East Liverpool*.—Month of May, 1903. Estimated population, 20,000. Total number of deaths, 26. No deaths from contagious diseases.

Toledo.—Month of January, 1903. Estimated population, 150,000. Total number of deaths, 151, including diphtheria, 6; enteric fever, 1; smallpox, 1; and 16 from phthisis pulmonalis.

Month of February, 1903. Total number of deaths, 137, including diphtheria, 3; enteric fever, 2; scarlet fever, 1; smallpox, 1; and 12 from tuberculosis.

Month of March, 1903. Total number of deaths, 164, including diphtheria, 3; enteric fever, 1; whooping cough, 4; and 14 from tuberculosis.

Month of April, 1903.—Total number of deaths, 143, including diphtheria 3, enteric fever 2, measles 1, smallpox 1, and 10 from tuberculosis.

RHODE ISLAND—*Nearport*.—Month of May, 1903. Estimated population, 23,000. Total number of deaths, 37, including diphtheria 2, enteric fever 1, and 8 from tuberculosis.

TENNESSEE—*Chattanooga*.—Month of May, 1903. Estimated population, 40,000; white, 27,000; colored, 13,000. Total number of deaths 66; white 40, colored 26, including 1 from whooping cough, smallpox 6, and 11 from tuberculosis.

Nashville.—Month of May, 1903. Estimated population, 81,803; white, 51,387; colored, 30,416. Total number of deaths, 128; white, 63; colored, 65; including enteric fever 3, and 17 from tuberculosis.

VIRGINIA—*Richmond*.—Month of May, 1903. Estimated population, 100,000; white, 62,250; colored, 37,750. Total number of deaths, 201; white, 82; colored, 119; including enteric fever, 5; measles, 5; whooping cough, 9, and 27 from tuberculosis—white, 10; colored, 17.

Plague in the United States as reported to the Surgeon-General Public Health and Marine-Hospital Service, from December 27, 1902, to June 19, 1903.

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually, or at the close of the calendar year, and new tables begun. For record of plague in San Francisco for calendar year 1902, see PUBLIC HEALTH REPORTS No. 52, December 26, 1902. A summary of cases since March, 1900, when the first case was officially reported, is as follows: Calendar year 1900, cases, 22; deaths, 22. Calendar year 1901, cases, 29; deaths, 25. Calendar year 1902, cases, 41; deaths, 41.]

FOREIGN AND INSULAR.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Carson reports as follows: Week ended May 31, 1903. Present officially estimated population, 8,500; 1 death; prevailing disease, mild type of malarial fever; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
May 29	Breakwater	34	8	18	5
29	David	19	0	0	0

CHINA.

Report from Hongkong—Plague and smallpox—Cholera—Plague in Canton.

Passed Assistant Surgeon McMullen reports, May 8, as follows: During the week ended May 2, 1903, five vessels were inspected and issued bills of health: 315 crew and 32 steerage passengers were bathed and 351 pieces of baggage disinfected. The number of plague cases reported during this week was the largest so far reported, and was probably influenced by the warm rainy weather which prevailed. Of the 95 reported cases, 93 were Chinese, 1 Jew, and an Indian, with a total of 83 deaths for the week.

The other communicable diseases reported during this week were as follows: Cholera, 2 cases with no deaths (1 European and 1 Chinese); 1 case each of diphtheria and enteric fever (European and Chinese), and one fatal case of smallpox (Chinese). This is the first cholera reported in the colony this year, but two cases are reported in Canton. Consul-General McWade, at Canton, reports that there is now an outbreak of plague in Canton, which made its appearance only a few days ago, but has rapidly increased and over 50 deaths have occurred.

Smallpox on steamship Korea, from San Francisco via Manila.

The S. S. *Korea*, from San Francisco, arrived from Manila on the 4th instant with six cases of smallpox among the steerage, reported as having occurred after leaving Manila. The vessel was sent to the quarantine anchorage for treatment by the local authorities and is yet held there.

COLOMBIA.

Report from Bocas del Toro, fruit port—Smallpox—Vaccination.

Acting Assistant Surgeon Osterhout reports as follows: Week ended June 2, 1903. Present officially estimated population not obtainable; number of deaths, 2; prevailing diseases, smallpox and malarial affections. The number of cases of smallpox can not be stated, as they are still scattered throughout the town. There are 32 cases in the pesthouse, 3 of them of the malignant type. General sanitary condition of this port and the surrounding country during the week not good. The effort to eradicate the smallpox is still being pushed. About 1,200 persons have been vaccinated and 2,000 more vaccine tubes have been ordered and are expected on steamer arriving to-morrow.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
May 27	Beverly.....	38	0	0	0
28	Fort Morgan.....	22	0	0	0
28	Snyg.....	14	0	0	0
30	Belvernon.....	23	0	0	0

COSTA RICA.

Report from Limon, fruit port—Yellow fever.

Acting Assistant Surgeon Gruver reports as follows: Week ended June 4, 1903. Census population, 4,000; number of cases of yellow fever 4, 1 death; number of deaths from other causes, 3. Annual rate of mortality for month ended May 31, 1903, was 66 per 1,000. Prevailing diseases, yellow fever and tuberculosis. The jail has become infected with yellow fever, and three of the cases reported above are from there. General sanitary condition of this port and the surrounding country during the week, poor. Dr. Beutel, chemist for the Costa Rican Government, came to Limon from San José on official business. On May 27 he became ill and returned to San José, where he died on May 30. His case was diagnosed as yellow fever.

Bills of health were issued to the following-named vessels:

Tuberculosis	2
Paludism	4
Pernicious fever	1
Diphtheria	1
Gastro-enteritis	2
Meningitis	2
Other causes	9
Total	21

It remains very dry here, and the poorer class of people have very bad drinking water. This will account for the increase in gastro-intestinal diseases.

The sanitary condition of the city is as good as it can be made under the circumstances, there being no sewerage system and the weather being very dry.

Mortality of Habana during the month of April, 1903—Increase in number of deaths from tuberculosis.

Minister Squiers at Habana reports, June 6, for the month of April as follows: There was a slight increase in the death rate as compared with the preceding thirty days, attributable to enteric fever, but it was lower than that of the same month of 1902. There has been no smallpox since July, 1900, and no yellow fever since September, 1901, and there has been a progressive decrease in malarial diseases, but with regard to tuberculosis the conditions have not been satisfactory. There has been an increase of from 5 to 6 per cent in deaths from that disease in each of the years 1901 and 1902, and now the proportion of deaths from tuberculosis is 16 per cent of the total mortality. Suitable measures will be taken to meet this unsatisfactory condition.

Reports from Habana—Inspection of vessels—Mortuary statistics.

Assistant Surgeon Trotter reports, June 4 and 10, as follows:

Week ended May 30, 1903.

Yellow fever on steamship Niagara, from Tampico for New York.

[Cablegram.]

HABANA, June 16, 1903.

WYMAN, Washington:

Ward Line steamer *Niagara*, four days out of Tampico, Mexico, arrived on 15th with one case of yellow fever, who died while being removed from ship at this port. Autopsy confirmed diagnosis. Case typical one. Vessel en route to New York. Cuban authorities have requested the disinfection of the ship by the *Sanator*, which will be done.

ECHEMENDIA.

Report from Matanzas—Mortality statistics.

Passed Assistant Surgeon von Ezdorf reports, June 10, as follows: During the week ended June 6, 1903, 6 vessels bound for ports in the United States received bills of health. Fifteen deaths were reported in this city, making the annual rate of mortality for the week 16.25 per 1,000. The chief causes of death reported were as follows: Tuberculosis, 3; enteric fever, 1; malarial fever, 1; uræmia, 1; enteritis, 3; heart disease, 2; other causes, 4. No quarantinable disease was reported in this district.

Report from Santiago—Inspection of vessels—Mortality statistics—Water supply.

Acting Assistant Surgeon Wilson reports, June 2 and 3, as follows: During the week ended May 30, 1903, bills of health were issued to 9 vessels bound for the United States and Porto Rico. No quarantinable disease has been reported.

Mortality statistics for the week ended May 30, 1903.

GERMANY.

Report from Berlin—Plague and cholera in various countries.

Consul-General Mason reports, May 31, as follows:

Plague.

Turkey.—According to the second official weekly bulletin regarding plague, there were registered between the 12th and 16th of May in Zobeir 2 deaths from plague, and in Messayda 2 new cases and 3 deaths. Total number of cases up to May 16, 39, with 30 deaths.

Egypt.—Between the 9th and 15th of May there occurred in the whole of Egypt 12 cases of plague (3 deaths).

British India.—During the week ended May 2d there were registered in the Bombay presidency 3,564 cases of plague (and 2,934 deaths), of which 921 cases (845 deaths) occurred in the city of Bombay and 196 cases (156 deaths) in Karachi.

Hongkong.—During the three weeks from 29th March to 18th April there occurred in Hongkong 142 cases of plague, with 128 deaths—1 European, 5 Indians (coolies), and 136 Chinese.

British South Africa.—According to the weekly bulletins there were registered between the 12th and 25th of April in Port Elizabeth 15 cases of plague; in King Williams Town, 5 cases; in East London, 2 cases.

Cholera.

Turkey.—Between the 4th and 11th of May there were registered in Damascus 6 cases of cholera (with 5 deaths).

According to the official weekly bulletin regarding cholera in Syria, there occurred between the 11th and 17th of May, 3 cases of cholera in Damascus (with 2 deaths), making a total, up to the 15th of May, of 94 cases and 84 deaths.

^a Diphtheria; both recovered.

Death rate of Berlin.

The death rate of Berlin for the week ended May 16 was lower than it has been since the beginning of April, and amounted, calculated upon the year, to 13.9 per thousand of the population, as compared with 16.3 in the foregoing week; this rate being also considerably lower than that for the corresponding week of last year, in which it amounted to 16.4. Of the large German cities, during this week, only the following showed more favorable figures than Berlin, namely: Düsseldorf, Charlottenburg (with 10.5), and Schöneberg (with 7.8 per thousand). The death rate of the following places was considerably higher than that of Berlin, viz: Dresden, Leipzig, Frankfurt-am-Main, Cologne, Hamburg, Breslau, Brunswick, Munich, Nuremberg, Stuttgart, Carlsruhe, as well as London, Paris, and Vienna. The decrease in the number of deaths was mainly among children in the first year of life. The mortality rate among infants fell since the foregoing week from 5.2 to 3.3 per year and mille, being thereby only about one-third of that of Chemnitz and Nuremberg and hardly half that of Munich. Acute intestinal diseases caused 41 deaths. Acute diseases of the respiratory organs claimed 34 victims (as compared with 64 in the foregoing week). For the first time during the present year there were no deaths from influenza. Eighty-six persons died of phthisis pulmonalis and 46 persons succumbed to cancer. There were further registered 2 deaths from diphtheria and 8 deaths from scarlet fever. Measles claimed 7 victims. Sixteen persons died by violence.

GUATEMALA.

Report from Livingston, fruit port.

Acting Assistant Surgeon Peters reports as follows: Week ended June 1, 1903. Present officially estimated population, 3,500; no deaths reported; prevailing diseases, varicella and malarial affections; general sanitary condition of this port and the surrounding country during the week, good. Varicella has developed among the children of Livingston, otherwise the health of this port remains unchanged.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
May 26	Breakwater	34	7	12
27	David	19
30	J. L. Nelson	8

The steamship *Breakwater* cleared from Puerto Barrios.

Varicella epidemic in Livingston.

Varicella has developed in epidemic form in Livingston among children, and there have been several cases among adults. So far no cases of smallpox have come under my observation here, but I have been informed that it is in the interior near the railroad. Otherwise the sanitary conditions of Livingston and Puerto Barrios remain good.

HAWAII.

Quarantine transactions at Honolulu and Hilo.

Passed Assistant Surgeon Cofer, chief quarantine officer for Hawaii, reports, May 26 and June 1, as follows:

Honolulu.—Week ended May 23, 1903: Number of vessels disinfected, 7; vessels inspected and passed, 6; crew inspected and passed, 115; cabin passengers inspected and passed, 56; steerage passengers inspected and passed, 6; pieces of baggage disinfected (crew), 43; pieces of baggage disinfected (steerage), 8; pieces of freight disinfected, 1.

Week ended May 30, 1903: Number of vessels disinfected, 6; vessels inspected and passed, 8; crew inspected and passed, 121; cabin passengers inspected and passed, 16; pieces of baggage disinfected (crew), 63.

Hilo.—Week ended May 21, 1903: Number of vessels disinfected, 1; vessels inspected and passed, 1; crew inspected and passed, 19; passengers inspected and passed, 11; pieces of baggage disinfected, 52.

Week ended May 23, 1903: Number of vessels disinfected, 1; cabin passengers inspected and passed, 10; crew inspected and passed, 40; pieces of baggage disinfected, 69.

Smallpox on steamship Korea at Honolulu.

The Pacific mail steamship *Korea* arrived here to-day with a case of smallpox on board in the person of the little daughter of a first cabin passenger. The sick and contacts were removed to the quarantine station, the quarters disinfected, and everyone was vaccinated.

HONDURAS.

Report from Puerto Cortez, fruit port.

Acting Assistant Surgeon Carter reports as follows: Week ended June 2, 1903. Present officially estimated population, 3,327; one death. Prevailing diseases, malarial fever of mild form, and intestinal troubles. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
May 27	Iberia	15	0	0	0
28	Breakwater	34	17	12	37
28	Spero	19	0	0	0
29	Jamaica	16	0	0	0
30	Mercator	17	0	0	0

JAPAN.

Reports from Yokohama—Plague on Steamship Kagashima Maru, from Bombay.

Assistant Surgeon Moore reports, May 15 and 21, as follows: During the week ended May 9, 1903, bills of health were issued to seven vessels, having an aggregate personnel of 608 crew and 1,062 passengers; 372 steerage passengers were bathed, and 619 pieces of baggage were disinfected.

During the above period cases of infectious diseases were reported in Yokohama as follows: Enteric fever, 3 cases, no deaths; diphtheria, 4 cases, 1 death; dysentery, 2 cases, no deaths.

On the 4th instant a case of plague is reported to have been discovered here on the *Kagashima Maru*, a liner plying between this port and Bombay.

During the week ended May 16, 1903, three vessels having an aggregate personnel of 333 crew and 682 passengers were inspected; 370 steerage passengers were bathed, and 746 pieces of baggage were disinfected.

During the above period two fatal cases of plague occurred in Yokohama. No new cases have since been reported.

Recurrence of plague in Yokohama.

Assistant Surgeon Moore reports, May 18, as follows: According to an official communication received this day by the United States consul-general from the governor of Kanagawa Ken, plague has again made its appearance in Yokohama. Two cases of the disease are reported, both having occurred on the 12th instant and having proved fatal on the 14th instant. The patients lived in separate residences at some distance from the chief centers of shipping activity. I believe that strict measures of isolation and disinfection are being enforced.

MEXICO.

Report from Coatzacoalcos—Sanitary measures undertaken.

Consular Agent Stubbs reports, May 30, as follows: A few months ago the contractors for the Coatzacoalcos Port Works, the Tehuantepec National Railway, and the Salina Cruz Port Works (on the Pacific side of the Tehuantepec Railway), in view of preventing a repetition of the epidemic that visited this port during the months of May and June of the years 1900 and 1902, arranged to combine with the municipal authorities in an effort to thoroughly purify Coatzacoalcos.

The medical officer of the company took charge of this work, which was commenced early in the month of April of the present year and has progressed steadily up to the present date.

The port of Coatzacoalcos is situated on the west bank of the river of the same name, directly at its juncture with the sea, and the residence portion, situated on a sandy knoll, has an elevation of 44 feet above sea level, gradually sloping to the south to an elevation of 7 feet in the lower portion of the town, the mean elevation being about 23 feet.

To the south of the town, about half a mile from the lower portion of it, a swamp existed, extending some miles up the river. As is well known, these swamps in tropical countries are the breeding places of innumerable mosquitoes. The contractors, however, had agreed to fill in this swamp, and at the present date have filled in over half a square mile with sand pumped from the river, the existing vegetation having, of course, been first cleared from it. This, naturally, decreased the number of breeding places of the mosquitoes. While this was being effected the problem that presented itself was the getting rid of the further breeding places of the mosquito. This, in a measure, has been effected by a general clearing up of all débris, such as old bottles, cans, broken glassware, etc., among which it is well known that the mosquito breeds. The surface and subsoil of Coatzacoalcos being pure sand, and the town itself situated on a slope, there are no deposits of water which could form other breeding places.

A force of men has been at work cleaning up the streets generally and removing all garbage and débris to a safe distance from the town, where same is burned or buried. A number of drains leading to the river have been found defective and the owners have been compelled to repair same. All closets which, upon inspection, were considered to be a menace to the general health conditions, were ordered to be closed until necessary repairs were completed.

No case of yellow fever has originated in Coatzacoalcos since the above work was started, although, of course, it is impossible to say whether this is due to improved sanitation and the above methods of combating the evil or to other causes over which we have no control. Nevertheless, it is confidently hoped and expected that the experience gained during the present year will make possible a more vigorous and effective campaign during the early months of the coming year, so that epidemic yellow fever in the port of Coatzacoalcos may be considered as being a remote possibility.

Health conditions at Guaymas—Quarantine against Mazatlan.

Consul Agent Crocker, at Guaymas, reports June 1 as follows: The health of this port remains good. Quarantine against Mazatlan is still in force.

Mazatlan declared free from plague.

[Telegram.]

MEXICO CITY, June 17, 1903.

WYMAN, Washington:

Mazatlan has been declared free of the plague. Please advise international committee.

LICEAGA.

Report from Progreso—Sanitary conditions—Inspection of vessels.

Acting Assistant Surgeon Harrison reports, May 30, as follows: The population of Progreso is between 4,000 and 5,000, composed chiefly of Spaniards, Mexicans, and native Indians, with a small number of English-speaking people. The elevation of the town site is low; the soil apparently a coral sand. Water for drinking is obtained from the house

tops during the rains and stored in cisterns, while that for toilet use is from wells and is quite brackish and hard. The streets are kept fairly free from trash and garbage by frequently cleaning with brooms, the collected garbage being deposited on the shore outside the town. Commodores inspected were clean and not offensive, some being supplied with water-flushing apparatus, others being simply open pits. The houses, business and residence, are mostly close together, consist of one story, resting directly on the ground, that is, without ventilating space between soil and floor, and abut directly on the narrow sidewalk. These houses, as seen from the street, are small, close together, and poorly ventilated.

Diseases reported in Progreso and surrounding country for ten days ending May 30, 1903, are as follows: Bronchitis, enteritis, tuberculosis, whooping cough, pneumonia, traumatic tetanus, but no case of quarantinable disease. Some cases, eight or ten, of yellow fever in Merida. Bills of health were issued to the following-named vessels:

May 26, American schooner *Flora Morang* (crew all, 7), to Ship Island; good.

May 27, Norwegian steamship *Daggry* (crew all, 17), to New York; good.

May 30, British steamship *Cheronea* (crew all, 23, and captain's wife), to Boston (supplemental); good.

Report from Tampico—Inspection of vessels—Mortality statistics—Yellow fever.

Acting Assistant Surgeon Frick reports, June 8, as follows:

Week ended June 6, 1903:

Inspected—

Steamships	3
Members of crews	108
Passengers	6
Baggage	pieces 9
Freight	do. 8,818

Disinfected: Steamship

Twenty-nine deaths, including yellow fever 9, and 4 from tuberculosis. Mortality rate, 75.04 per thousand.

Sixteen new cases of yellow fever were reported. During the previous week there were 8 new cases reported; on May 25 there were 2 cases under treatment, making a total of 26 cases under treatment during the last two weeks ended June 6, 1903. During the same period there were 14 deaths from yellow fever.

There are under treatment, at the present time, 9 cases at the civil hospital, 3 cases at the Mexican Central Hospital, 2 cases at their respective homes; making a total of 14 cases under treatment.

The infection seems to be confined to three different localities, and with the exception of 2 cases, a German carpenter and a Swede civil engineer, the cases occurring up to this date have been among the poorer classes of natives. The business portion of the town apparently remains clear of infection.

Report from Vera Cruz—Mortality statistics—Yellow fever.

Assistant Surgeon Goldberger reports, June 1 and 8, as follows: During the week ended May 30, 1903, there was officially recorded a

total of 40 deaths in this city, of which 4 were due to yellow fever, 3 to pernicious fever, 2 to remittent fever, and 6 to tuberculosis. The sanitary condition of the city has undergone no material change.

During the week ended June 6, 1903, there was recorded in this city a total of 43 deaths, of which 8 were due to yellow fever, 2 to remittent fever, 5 to tuberculosis, 5 to entero-colitis, and 3 to tetanus.

The infection of yellow fever is scattered over the city and the number of cases reported is increasing daily. During the week under consideration 26 cases were reported, whereas during the seven days ended May 30 there were reported 17; during the week preceding, only 12.

The authorities are striving to put the city into a better sanitary condition, but on account of the scarcity of labor progress is slow.

Outbreak of an epidemic disease in Yucatan.

Consul Thompson, at Progreso, reports, May 13, the outbreak of an epidemic disease resembling influenza of a highly contagious and malignant type. The disease was first reported among Chinese and Mexican laborers, lately imported, employed on plantations near the interior town of Teket. It has caused several deaths, which occurred in rapid succession. In most cases contagion was traced to attendance upon the sick. The Government took immediate measures to check the spread of the disease, besides providing suitable medical assistance and sending a delegate of the State board of health to investigate and report.

NICARAGUA.

Report from Bluefields, fruit port.

Acting Assistant Surgeon Goodman reports as follows: Week ended June 6, 1903. Present officially estimated population, 4,000; 2 deaths; prevailing disease, malarial fever; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
May 31	Hiram	14	0	0	0
June 3	Utstein	16	0	0	0
5	Nicaragua	16	0	0	0
5	Agnes	13	0	0	0

PERU.

Report from Callao—No further cases of plague—Sanitary conditions.

Vice-Consul Cree reports, May 18, as follows: No further cases of plague have occurred. Of those who were under observation two have recovered; the other two are doing well. The health of Callao is very good, there being fewer cases of ordinary sickness than usual at this time of the year.

PORTO RICO.

Report from San Juan—Varioloid—Mortality statistics.

Past Assistant Surgeon Lumsden, acting chief quarantine officer for Porto Rico, reports, June 6, as follows: There are at present 5 cases of varioloid in San Juan. These cases are well isolated by the superior board of health. The disease is mild in character and the outbreak sporadic.

The mortality reports from the subports are as follows: Mayaguez, 96; Arecibo, 99; Humacao, 26; Fajardo, 49; Aguadilla, 43; Arroyo, 15.

Inspection of immigrants.

Report of alien steerage passengers arriving during the week ended June 6, 1903, at the six subports of Porto Rico:

Humacao, 1.

Mayaguez, Arecibo, Fajardo, and Arroyo, no transactions.

Report from Ponce.

Acting Assistant Surgeon Malaret reports, June 8, through the acting chief quarantine officer for Porto Rico, as follows: During the week ended June 6, 1903, 6 bills of health were issued. The report of the local board of health shows no cases of quarantinable disease in Ponce during the week, and the sanitary conditions of the city and surrounding district are good so far.

VENEZUELA.

No yellow fever at La Guayra and Caracas.

The consul at La Guayra reports, June 5, as follows: No yellow fever at La Guayra; fevers exist Caracas endemic; doctors disagree, nature. Noted physician claims no case real yellow four months, owing lack black vomit.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

AFRICA—*Sierra Leone*.—Two weeks ended May 16, 1903. Estimated population, 40,000. Total number of deaths, 34. No contagious diseases.

ARGENTINA—*Buenos Ayres*.—Month of March, 1903. Estimated population, 875,396. Total number of deaths, 953, including diphtheria 4, enteric fever 26, measles 1, scarlet fever 7, smallpox 8, and 138 from tuberculosis.

AUSTRIA—*Brunn*.—Month of March, 1903. Estimated population, 93,542. Total number of deaths, 254, including diphtheria 1, scarlet fever 4, and 65 from tuberculosis.

BRITISH GUIANA—*Demerara—Georgetown*.—Month of April, 1903. Estimated population, 36,567. Total number of deaths, 204, including 32 from tuberculosis.

CUBA—*Habana*.—Month of April, 1903. Population, 236,000. Total number of deaths, 474, including diphtheria 4, enteric fever 13, whooping cough 2, and 95 from tuberculosis.

FRANCE—*Rouen*.—Month of April, 1903. Estimated population, 116,316. Total number of deaths 316, including diphtheria 8, enteric fever 3, measles 19, scarlet fever 1, smallpox 1, and 64 from tuberculosis.

St. Etienne.—Two weeks ended May 15, 1903. Estimated population, 146,671. Total number of deaths 124, including diphtheria 1, enteric fever 1, measles 1, and 17 from tuberculosis.

JAPAN—*Formosa*.—Month of January, 1903. Estimated population, 2,797,543. Total number of deaths not reported. One death from diphtheria, 1 from typhus fever, and 57 deaths from plague reported.

Month of February, 1903. One death from diphtheria, 1 from typhus fever, 1 from smallpox, and 46 deaths from plague reported.

JAVA—*Batavia*.—Two weeks ended April 25, 1903. Estimated population, 150,000. Number of deaths not reported. No contagious diseases.

MALTA.—Three weeks ended May 23, 1903. Estimated population, 189,749. Total number of deaths, 161; including diphtheria 1, and 2 from measles.

PORTO RICO.—Month of April, 1903. Estimated population, 953,243. Total number of deaths, 966, including diphtheria, 2; enteric fever, 3; smallpox, 1, and 128 from tuberculosis.

RUSSIA—*Riga*.—Month of December, 1902.—Estimated population, 282,000. Total number of deaths, 529, including diphtheria 6, enteric fever 5, measles 9, scarlet fever 12, whooping cough 3, smallpox 42, and 57 from phthisis pulmonalis.

Year ended December 31, 1902.—Total number of deaths, 6,261, including diphtheria 62, enteric fever 67, measles 84, scarlet fever 251, whooping cough 58, smallpox 184, and 686 from phthisis pulmonalis.

Month of January, 1903. Estimated population, 282,000. Total number of deaths, 528, including diphtheria, 5; enteric fever, 5; measles, 4; scarlet fever, 18; whooping cough, 2; smallpox, 27, and 60 from phthisis pulmonalis.

WEST INDIES—*St. Thomas*.—Two weeks ended May 29, 1903. Estimated population, 11,012. Total number of deaths, 17. No contagious diseases.

SPAIN—*Corunna*.—Month of May, 1903. Estimated population, 50,000. Total number of deaths, 94, including diphtheria, 1; enteric fever, 3, and 13 from tuberculosis.

Cholera, yellow fever, plague, and smallpox, December 27, 1902, to June 19, 1903.

[Reports received by the Surgeon-General Public Health and Marine-Hospital Service from United States consuls through the Department of State and from other sources.]

[For reports received from June 28, 1902, to December 26, 1902, see PUBLIC HEALTH REPORTS for December 26, 1902.]
